

KAMM

Design by Michael Hilgers

Material

2 mm sheet steel,
colored powder coating in fine structure

Dimensions

Shelves

Width approx. 800 mm; depth approx. 150 mm

Wall profiles

Height approx. 800 mm; depth approx. 100 mm

Weight

approx. 9 kg

Installation

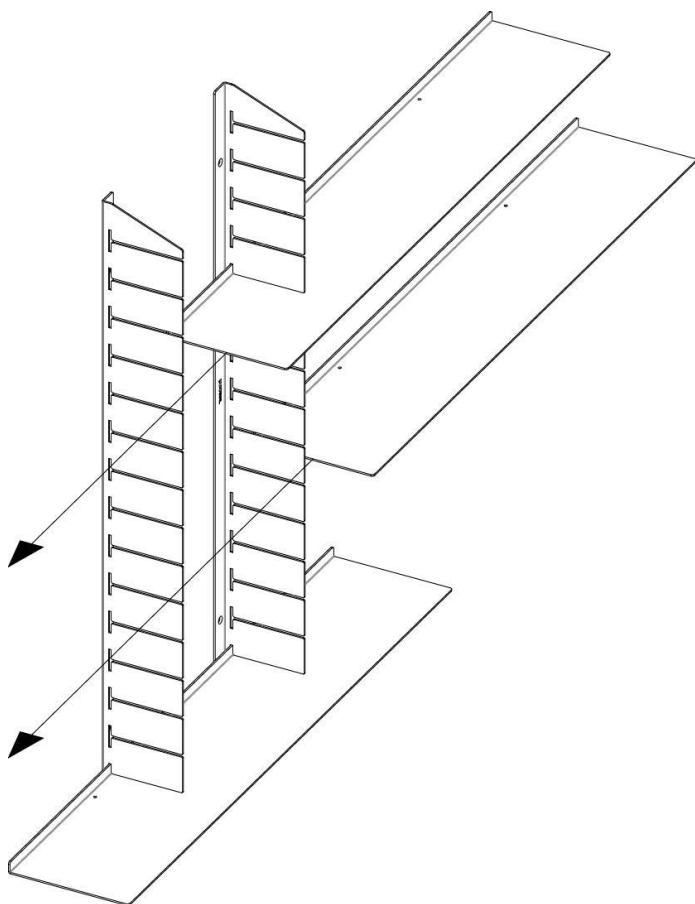

Mark the drill holes at the specified distances on your wall. You should use a spirit level for precise alignment.

We recommend fixing with wall plugs suitable for the wall and countersunk screws. Now attach the two side panels vertically to your wall.

If you are not sure about the quality of the wall, the drill holes and the choice of suitable wall plugs, please contact a craftsman.

Now slide your three shelves into the wall profiles at the desired height. DONE.

You can find additional information or assembly examples on our website or on Instagram.

Care instructions

Our purSTAHL products are made from particularly durable materials and have a high-quality, hard-wearing powder coating.

To ensure that you can enjoy your KAMM for a long time, you should observe the following points to avoid damaging the surface.

You can use a lint-free dust cloth for cleaning. You can also use a damp cloth with a mild, non-abrasive cleaning agent.

You should not use steel wool or scouring pads for cleaning. You should also not use cleaning agents containing solvents.

**Feel free to follow us.
Have fun with your new KAMM!**
